

Turn To **FlexiCap**TM

The New *Twist* In Hearing Protection!

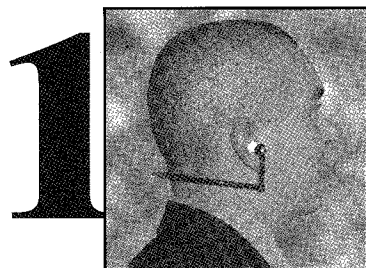

FlexiCap semi-aural hearing protectors feature the multi-position Flex band combined with the comfort of E-A-RCaps hearing protectors

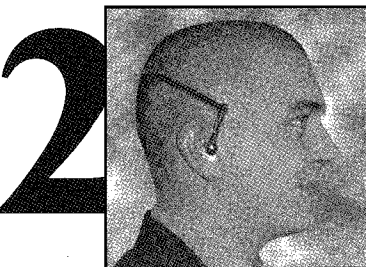

FlexiCap offer the flexibility and compatibility of the new Flex band and the world's most popular semi-aural hearing protector. FlexiCap feature the innovative, patented hinged headband allowing for a variety of wearing positions without compromising other forms of personal protective equipment. The patented pod features the soft, smooth polyurethane cap design of our popular semi-aural E-A-RCaps. The pod seals the earcanal entrance without the need for insertion, providing greater wearer comfort. A secure, comfortable seal of the pod in the ear results from the easily adjustable patented ball and socket joint.

The FlexiCap headband can be worn in different positions to reduce or eliminate the annoying and distracting noise which can occur if a band rubs against clothing.

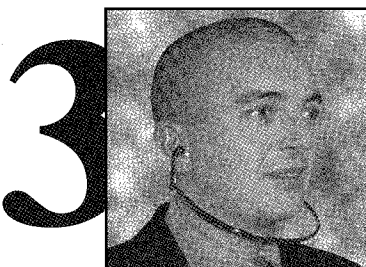

The consistent protection in all three working positions reduces the workplace supervisor's responsibility for ensuring correct wear.

1 Behind The Head

2 Over The Head

3 Under The Chin

Under The Chin

Frequency (Hz)	63	125	250	500	1000	2000	4000	8000
