

SIP 02693 DIY Display Welding electrodes 10 x 2.5mm

Pack of electrodes; 10 x 2.5mm. Come packaged in pvc wallets to assist storage and prolong life. The electrodes have been designed to give quality results when used with SIP welding equipment.

The electrodes are of a high quality, rutile coated and are an all position general purpose electrode. The electrodes are excellent for working with mild steel and they have been designed to produce an excellent easy striking and stable arc including self-releasing slag. The electrodes maintain their shape and a weld shape seam finish.
